ITYX

WHAT WE ARE MADE OF

Make work more creative and divers

Rescue your employees from dull manual data entry

Mission: digital intelligence!

Everyone deserves intelligent machine support

Because it relieves us from tiresome routine processes and upgrades the work we do.

We are a global leader in intelligent digitalization of written communication, **with unrivaled expertise in artificial intelligence (AI) and machine learning.**

As AI pioneers, we are experts in IPA (intelligent process automation) software and automate all of your organization's text-based processes ...

… to rescue your employees from manual processing and instead make room for jobs full of creativity and variety.

INNOVATION

## Data is the fuel of digital intelligence

Data is found in your documents, applications and communication with your customers and partners. **We have been capturing data for 25 years — with tremendous passion and great success.**

PRECISION

The difference is in the small details

To err is human. Mistakes happen. Our platform learns from mistakes. **We are passionate about precision, about what's feasible with technology.** We'd be happy to face off against any competitor in a performance test. Bring on the challenge.

EMOTION

Humans should not work like robots

Digital intelligence offers a chance for us as humans to advance beyond ourselves. That's why we work so hard every day on uncovering this incredible potential, so your employees and your customers can experience it.

**… the simplest way to extract precise, structured data from unstructured content.**

- It enables your organization to unterstand unstructured content, enabling you to extract relevant data and processable knowledge and trigger subsequent actions — automatically, safely and precisely.

- Businesses as well as public administration offices use it for automation: The AI service precisely captures (and understands) text-based content in documents and emails to automate manual processing steps in service and back office.
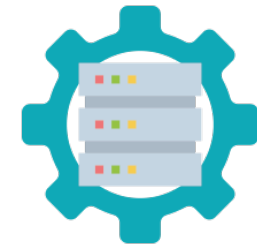

Make processing transactions in business and administration efficient, with our AI service.

Rescue your employees from tiresome manual tasks.

React quicker and preciser to customer inquiries.

Without requiring elaborate changes to your existing system infrastructure.

The crucial competitive edge!
